Year 5.1 Computer Networks and Online Safety

L.O. Pupils show an awareness of a range of network devices, internet services and how to use them safely.

Clients	Devices that connect to a network including computers, laptops, printers
Network	A way for computers to connect and share data
Switch	A device that enables devices connection to the network
Server	Stores information and data that clients can access
Modem	Allows a network to connect to the internet
Input devices	We enter information into the computer with these devices - keyboard, mouse,
Output devices	We see the output from these devices - Printer, monitor, speakers
